There's so much to celebrate

For 10 years Instinct has delivered a comprehensive quality range of bathroom, plumbing and heating products sold exclusively by a select group of leading regional merchants & showrooms across the UK.

Ever since its inception the Instinct brand ethos has always remained true to its principles.

Deliver high-build quality products

Products to be well designed and engineered

Products to be styled by leading industry designers

Products to incorporate cutting-edge technology where possible

Products must represent good value

Products to be supported by all necessary regulatory requirements

Whether you are looking for something to complement your existing or new bathroom, the Instinct product portfolio will inspire a high-quality bespoke solution for you.

Now isn't that worth celebrating.

Contents

We've got you covered

Welcome to the Instinct Pro Plumbing and Heating Collection 2023. A comprehensive quality range of plumbing and heating products designed with the Installer and Heating Engineer in mind.

Designed for performance, quality and reliability

Our heating collection provides a selection of boilers, cylinders and peripheral components including compact radiators and towel rails available in a choice of finishes. Within our plumbing range you will find heating system chemicals, scale inhibitors, magnetic filters as well as plumbing tools and core drill sets.

At Instinct Pro we believe in quality manufacturing and pride ourselves on providing a wide range of plumbing and heating solutions designed and manufactured in the UK.

If you are looking for a cost effective plumbing + heating solution for a range of domestic installations, our product portfolio can provide the answer for you.

Instinct Hot Water Cyclinders Work hand in hand with your boiler

Combining quality, durability and efficiency, the Instinct hot water cylinder range has been designed to work in harmony with your boiler for fantastic results.

Available in sizes of up to 300 litres, Instinct's hot water cylinders can help keep your home wrapped in comfort all year long – whatever your central heating needs. We have five models in the range, all with a 2 year parts and labour warranty.

25 year vessel warranty

Less space required – no need for a water storage tank in the loft

Available in sizes up-to 300 litres

Corrugated heating coil

Manufactured from duplex stainless steel

Manufactured in the UK

Instinct's hot water cylinders work with your boiler to provide your home with the heat and warmth you need, perfect for homes that have a high demand for hot water.

Instinct hot water cylinders – a high quality addition to your central heating system.

Ideal Instinct² Combi Boiler

The Instinct² combination boiler is available in outputs of 24, 30 and 35 kW providing a cost effective heating solution for a range of domestic installations.

Complete with domestic hot water temperature controls including a switched preheat function, mechanical built-in timer and a digital operating status & diagnostic display, the Instinct² provides reliable control of the homes heating and hot water performance.

Finish – White

Finish – White

Dimensions – 700(h) x 395(w) x 285(d) mm

Installation – Quick and easy to install

Compact Design – Compact cupboard fit

Maintenance – Easy access to all components

Parts – Tried and tested technology (inc. Grundfos pump)

Flue – Fast Fix flue turret connections Compatibility – Ideal OpenTherm wired room thermostat

available for Boiler Plus compliance
Valve – Pump/diverter valve exercise & anti-cycling

functions Preheat Function – Fast hot water response through DHW

preheat Servicing – Fully supported by Ideal Service Division

Ideal OpenTherm Wired Room Thermostat

Specifically designed to work with the Instinct² by providing temperature control and Boiler Plus compliance in one simple device.

Boiler Plus

Boiler Plus is a set of standards implemented in England in April 2018. The boiler should have an ErP efficiency of at least 92%, and time and temperature controls should be installed. For replacement combi boilers an additional energy efficiency measure is needed, such as enhanced load compensation.

The Instinct 2 boiler is over 92% efficiency and has built in time control with the mechanical timer. The Ideal OpenTherm Wired Room Thermostat provides temperature control and Enhanced Load Compensation. The perfect combination to comply with Boiler Plus.

Finish - White

Dimensions – 96(h) x 95(w) x 35(d) mm

Installation – Easy Install
Styling – Slim, modern design with simple dial and button design

Display – Backlit colour screen with large text and icons Functionality – Easy temperature control
Compatibility – Compliments the mechanical timer

Accreditation – Boiler Plus compliant

Power Source - Wired power (no batteries) using the OpenTherm connection

Fixing - Trim plate included

Condensate Pump

Condensate Removal Pump

One-piece centrifugal pump with tank.

Centrifugal pump for heavy and contaminated condensates. Suitable for gas condensing boilers producing acid (pH > 2.5) and hot condensates (55°C max, 80°C short peaks 10 minutes). Normally closed alarm contact that automatically cuts off the air conditioning system compressor or a solenoid valve.

Finish - White

Dimensions – 129(h) x 146(w) x 287(l) mm Installation – 4 fixing slot holes that allow the pump to be attached either on a wall or hanging from a ceiling (on M8 or smaller screw thread size)

No. of Inlets – 4 inlets Ø30mm Accessibility – Quarter turn easily removable check valve, for PVC tubing 10 mm (3/8") or 6 mm (1/4") Sound (in application at 1m) – Low level, quiet operation $\leq 45 \text{ dBA}$

Maintenance – Easily removable tank and reversible pump Float - Oil and acid resistant

Stability - Reinforced mechanical structure improving shocks resistance

Pump – High discharge head

Flow Rate - High flow rate for shorter running time Thermal Protection – 120°C (auto reset)

Max discharge head – 5.4m (65 l/h)

25 Years 2 Years on Parts

Cylinders

What are we doing?

We are pleased to announce the launch of the new Instinct Pre Plumbed System Ready range for cylinders. Available in sizes 120, 150, 170, 200, 250 + 300 Litres.

Why are we doing this?

Competitors have developed pre-plumbed ranges that can compete in the lower end of the market therefore a System Ready cylinder based on the ES under Instinct brand to compete in this market was developed with a pipework layout to differentiate it from the current PRO PPSR.

Features + Benefits

Designed exclusively, maintaining the aesthetics and architecture of the current Instinct indirect range of cylinders

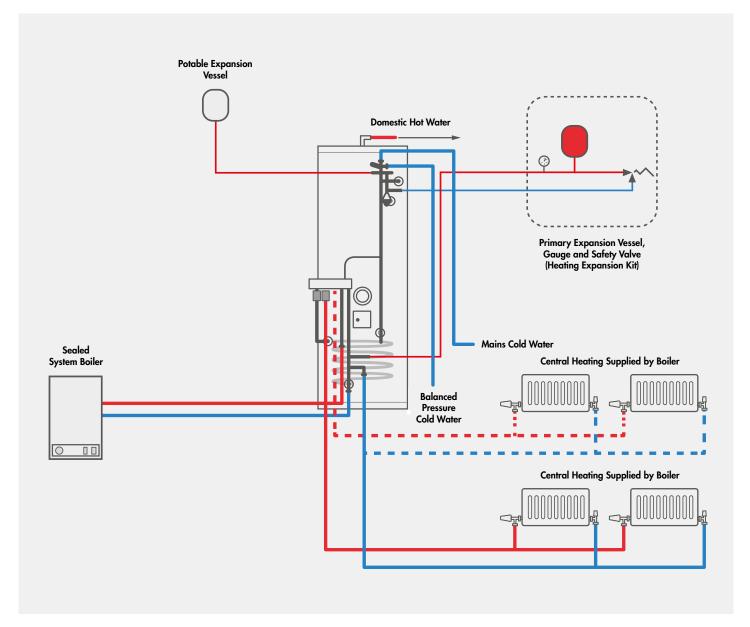

New pipe layout to suit smaller diameter cylinder to enable continuity of branding compared to PRO with wider diameter

Designed with standard plumbing parts for improved ease of installation, and installer familiarity, ensures easy on site installation

Specific designed System Ready for retrofit installations

Straight pipework to assist with insulating and simplicity

Consistent quality fittings with press fittings

Radiators

Guarantees

Henrad Compact K3 Radiators

The Compact K3 is the ideal choice for low energy systems, providing outstanding heat output from a smaller footprint. Henrad Compact K3 has been independently tested to ensure these radiators perform to a maximum working pressure of 10.0 Bar.

Finish – Traffic white (RAL9016)
Dimensions – See below
Installation – Henrad Compact K3 has 4 x ½" BSP connections as standard
Safety – Tested to withstand 10.0 Bar

Scale Inhibitors

Magnetic Scale Inhibitor

The range of Instinct Scale Inhibitors are manufactured by Scalemaster® in the UK and incorporate the original Scalemaster® patented technology.

Copper Mesh Enhances Limescale Inhibitor Performance

Instinct and Scalemaster® in-line limescale inhibitors incorporate an active element (magnet or zinc anode) encased in pure copper mesh. The mesh increases the surface area of copper in contact with the water passing through the unit which enhances the electrochemical effect (removal of dissolved oxygen and treatment to prevent limescale precipitation). Only Scalemaster® products use this technology (Patent No. 2285936) which has been proven in independent tests (by British Gas R&D) to extend boiler life typically by 50% by preventing scale build up in hard water areas.

The copper mesh - zinc/magnet anode pair reduces the water flow rate through the unit by less than 1%.

Finish – Green

Dimensions

 $130(l) \times 28(d) \text{ mm } (403328)$

136(l) x 35(d) mm (403335)

Installation – Easily installed, slip couplings for easy fit

Maintenance - No moving parts, no maintenance required

Power Source - Needs no chemicals or power, earth bonding not required

Manufacture - Made in the UK with Scalemaster® patented technology

Protection – Single appliance protection

Accreditations - WRAS Approved Product Economy - Saves on energy costs

INSTINCT® PRO

by Scalemaster®

The perfect concentration for reliable results

Chemicals

Introducing the range

Alongside Scalemaster®, a leading supplier of quality water treatment products for over 30 years, INSTINCT has continued its commitment to product innovation, energy efficiency and the environment with the launch of a 250ml range of chemical solutions for heating systems. This new size evolution provides same dose as larger bottles but with less packaging waste whilst maintaining recyclable content.

All 250ml bottles are manufactured from 50% recycled High Density Polyethylene (HDPE)

All 250ml bottles are fully recyclable due to the white caps & security rings

All 250ml bottles will treat a 100 Litre (10 Rad) system

All 250ml bottles are Non-Hazardous formulations

250ml IN-100 Corrosion Inhibitor is NSF CIAS Approved

Ideal for dosing through a system filter

IN-100 in box quantities of 20, all other 250ml products in the range in mixed boxes of 20

Bottles Made from 50% Recycled Plastic

Great Britain

IN-100 Concentrate Corrosion Inhibitor

IN-500 Concentrate Leak Sealer

Chemicals

Heating System Chemicals

IN-100 Corrosion Inhibitor

Prevents corrosion, hard water limescale precipitation and is essential for protecting hot water heating systems and maintaining operational efficiency.

The 5 Litre Bottle (504582) is concentrated and will dose 2000 Litres.

Dimensions -

 $250(h) \times 55(w) \times 55(d) \text{ mm } (504513)$ 137(h) x 72(w) x 49(d) mm (504223) 275(h) x 175(w) x 125(d) mm (504582)

504513	300ml Aerosol
504223	250ml Bottle
504582	5 Litre Bottle (Concentrated)

IN-300 System Cleaner

For commissioning new heating systems. Removes installation foulants, flux, grease and debris suspended in water by flushing. Should be left in system min 2 hours, max 2 weeks.

The 5 Litre Bottle (504599) is concentrated and will dose 2000 Litres.

Dimensions -

 $250(h) \times 55(w) \times 55(d)$ mm (504520) $137(h) \times 72(w) \times 49(d) \text{ mm } (504247)$ 275(h) x 175(w) x 125(d) mm (504599)

Real-time measurement of corrosion inhibitor protection, on-site, in under 5 minutes!

(For annual testing compliance with BS7593:2019)

Phone not included

Water Testing

i-Test

Are you British Standard Compliant?

Poor water quality is the most common root cause of central heating breakdowns. It is now a requirement of BS 7593:2019 to carry out an annual check of heating system water quality as part of the system maintenance programme.

What is BS 7593:2019 and why is it important?

BS7593 is the British Standard code of practice for the preparation, commissioning and maintenance of domestic central heating and cooling water systems. It applies to individual domestic properties when commissioning a new system for the first time, re-commissioning following the installation of a new boiler, or any other major remedial work on the heating system.

The latest iteration, (BS 7593:2019) came into effect on 31 May 2019. Compliance is a regulatory requirement within Part L of Building Regulations and includes carrying out a check on inhibitor level to prevent corrosion.

Scalemaster® i-Test® - Inhibitor Tester

Scalemaster® iTest® provides a revolutionary way to check if the heating system water is healthy and there is sufficient active inhibitor present to provide adequate protection against corrosion on metals typically in a system. It doesn't just check if there is some chemical in the water - it provides a real-time measurement of corrosion protection provided in reference to the target performance levels of the NSF CIAS tests.

Unlike single dipstick tests, i-Test® will show:

- The level of corrosion protection provided by any inhibitor present
- If there are any other chemicals (such as system cleaner) or flux residues present working against the inhibitor to increase corrosion
- If the corrosion in a system is actually worse than in the tap water used to fill it!

506104	Scalemaster i-Test
506111	Scalemaster i-Test Replacement Probe (Pack of 10)
506128	Scalemaster i-Test Replacement Probe (Pack of 50)

6 Simple Steps to Check Corrosion Inhibitor Protection

Step 1Download the app

Step 2 Clean the probe

Step 3 Insert the probe

Step 4 Check tap water

Step 5Test system water

Step 6Generate report

Test Methodology

i-Test works by measuring the corrosion between two different metals (iron and copper) suspended in a small sample of system water. The signalling unit sends data to a free-to-download App on your smartphone which decodes and processes the data to generate a report which can immediately be sent to the customer or printed on a local printer.

Download the instructions and watch the video at www.i-test.com or www.scalemaster.co.uk

Magnetic Filters

Years on Magnetic Filters

Years on Trade Tec Filters 2

22mm + 28mm Magnetic Filter (Isolation Valves)

The Instinct ECO-Mag magnetic central heating filter is the ideal solution to help combat against costly and unnecessary system breakdowns caused by both magnetic and non ferrous particulate in fluid based systems. The Instinct ECO-Mag can be used on all types of central heating systems and it is recommended, for maximum effect, that the filter be fitted on the return leg of the system, between the last radiator and the boiler.

Finish - Black

Dimensions -

242(h) x 232(w) x 157(d) mm (INMAG22) 242(h) x 245(w) x 157(d) mm (INMAG28)

Triple Action Filter – Magnetic filter, non ferrous filter and manual air separator actively filters magnetite and non ferrous debris

Filter Magnet - 12000 gauss removable magnet

Dosing Capacity – 500ml large dosing pot capacity enables installers to quickly dose without having to drain down the whole system

Maintenance - Manual air bleed, even if the filter isn't serviced, it will never inhibit system performance as its unique connection, aided by full bore isolation valves, means that it will never block

Spares - Supplied with a full set of spare sealing washers and O-rings

Valves – Full bore isolating ball valves on inlet and outlet connections ensures that full flow is always achieved to maintain system performance

Installation - Can be installed anywhere on any orientation of pipework saving the installer time and money effortless servicing and fitting

MAGFILTOOL	Spanner for INMAG magnetic filters
INMAG28	28mm Magnetic Filter (Isolation Valves
INMAG22	22mm Magnetic Filter (Isolation Valves

22mm + 28mm Trade Tec Magnetic Filter (Isolation Valves)

The Trade-Tec magnetic central heating system filter, featuring our innovative double gauze non-ferrous filter, is suitable for all central heating systems and can be fitted anywhere, in any orientation on the central heating circuit.

For maximum system protection however, we recommend that you fit the magnetic filter on the return leg of the circuit, between the last radiator and the boiler.

Dimensions - 193(h) x 240(w) x 153(d) mm

Filter – Actively filters magnetite & non-ferrous system debris, unique double gauze non-ferrous filter

Filter Magnet – Removable high strength magnet

Dosing Capacity – 500ml large dosing pot capacity enables installers to quickly dose without having to drain down the whole system

Maintenance – Manual air vent Drain Valve – Low profile drain valve

Valves – Full bore isolating ball valves

Installation - 360° fully rotatable installation, convenient in line fitting, short installation footprint

Magnetic Filters

The IntaKlean Nano is a magnetic system filter designed to remove ferrous and non ferrous material from fluid systems. This compact magnetic filter is designed for use on fluid heating systems, the perfect solution for where clean and efficient systems are required but a small installation footprint is paramount.

For maximum system component protection we advise that the IntaKlean Nano is installed onto the return leg of the circuit, between the last radiator and the boiler.

Finish - Black

Dimensions – $144(h) \times 226(w) \times 66(d)$ mm

Filter – Effectively filters ferrous and non ferrous system debris, 800µm stainless steel filter cartridge for ultimate particle capture

Filter Magnet - 12,000 Gauss, fully removable dry pocket magnet

Dosing Capacity – 200ml
Maintenance – Transparent settling chamber to easily identify servicing intervals

Valves – Complete with isolating ball valves Compatible Fluid – Water, Water + Glycol 50% Max

Installation - Specific compact design for small installation footprints, multiple inlet/outlet variations to suit any installation requirement

IKN22

22mm IntaKlean Nano Magnetic System Filter

3/4" IntaKlean Nano Magnetic System Filter

The IntaKlean Nano is a magnetic system filter designed to remove ferrous and non ferrous material from fluid systems. IKN34 has been specifically designed to be installed directly underneath the relevant heat source such as boilers, heaters and Heat Interface Units.

For maximum system component protection we advise that the IntaKlean Nano is installed onto the return leg of the circuit, between the last radiator and the boiler.

Finish - Black

Dimensions – $144(h) \times 171(w) \times 66(d)$ mm

Filter – Effectively filters ferrous and non ferrous system debris, 800µm stainless steel filter cartridge for ultimate particle capture

Filter Magnet - 12,000 Gauss, fully removable dry pocket magnet Dosing Capacity – 200ml
Maintenance – Transparent settling chamber to easily identify servicing intervals

Valves – Complete with isolating ball valves Compatible Fluid – Water, Water + Glycol 50% Max

Installation - Multiple inlet/outlet variations to suit any installation requirement, direct under boiler connections

Fernox TF1 Sigma UB Filter (Suitable with Ideal Instinct² Combi Boilers)

Composite under boiler system filter with a brass manifold designed for easy installation in small, restricted areas and with concealed pipework. This high-performance filter can be installed directly under the boiler or in restricted spaces due to the compact, versatile design. The TF1 Sigma UB Filter offers the ultimate in installer choice and provides high efficiency protection against the build-up of system debris.

The Filter has been designed to ensure there is minimal pressure loss in addition to maintaining a high collection efficiency. The filter has been designed to capture a range of system contaminates, whilst also ensuring it cannot block, reduce flow through pipework or impact the performance of the heating system.

The TF1 Sigma UB Filter utilises a range of high-quality component parts that ensure the filter offers optimum performance. The three-way ball valve has been designed to allow users to easily operate by hand, whilst also providing a reliable serving procedure. The filter manifold includes a secure connection to the system and a robust service point allowing the filter to be drained and cleaned. The magnet is made using premium grade neodymium, enabling a high efficiency capture rate, as well as a robust filtration medium that will ensure a continued and consistent level of collection

Finish - Black

Dimensions – 88(h) \times 189(w) \times 73(d) mm

Compact Design – A high capacity, compact design Installation – Ideal for use in restricted spaces

Valves – Integrated three way valve with filter isolation and cleaning functionality Construction – Durable and robust construction, made from a high-quality glass reinforced engineering polymer, and non-porous forged brass Filter - Will not block or restrict flow

Maintenance - Can replace return valve if required

Soldering + Brazing

Omat® Soldering & Brazing Pad

Quantity - 1 Dimensions -240(h) x 240(w) x 5(d) mm (INST2361) 155(h) x 155(w) x 5(d) mm (INST2363)

250mm (10") Soldering & Brazing Pad

The INST2361 OMAT® is a patented, slotted protection mat for soldering pipes and tubes to protect walls, cables, carpets and other flammable material. The OMAT® slot has an overlap at the back which enables the protective mat to go either side of the tube or pipe being soldered so as to protect the surrounding area from burning or scorching as well as reducing the risk of fire. It is particularly useful under kitchen units and on pipes perpendicular to the wall where the use of a non-slotted mat would not easily cover the area. The OMAT® is designed for use on pipes and tubes 15 to 22mm diameter.

150mm (6") Soldering & Brazing Pad

A patented, slotted protection mat or pad for soldering and brazing 15mm and 22mm copper tube and pipe. The size of the mat is $150 \, \text{mm} \times 150 \, \text{mm}$ (6" \times 6") for use in really awkward places where the larger sizes of Omat® would obstruct easy access of the soldering torch. It is designed to protect walls, cables, carpets and other flammable material surrounding a pipe being soldered/brazed. The slot in the Monument 2363L Micro Omat® has an overlap at the back which enables the protective mat to go either side of the tube or pipe being soldered/brazed so as to protect the surrounding area from burning or scorching, as well as reducing the risk of fire. It is particularly useful under kitchen units and on pipes perpendicular to the wall where the use of a non-slotted mat would provide inadequate cover of the area to prevent damage.

INST2361 Omat® 250mm (10") Soldering & Brazing Pad

INST2363 Omat® 150mm (6") Soldering & Brazing Pad

Copper Pipe Cutting + Bending

15mm & 22mm Copper Pipe Bender (Guides)

Quantity – 1

Dimensions – $700(h) \times 135(w) \times 155(d)$ mm

The INST2600 15mm and 22mm Copper Pipe Bender is designed to professionally bend BSEN1057 15mm and 22mm copper pipe and 15mm stainless steel tube. The aluminium formers are marked with bending angles of 30, 45 and 90 degree offsets allowing for accurate bending. The Trade Instinct Pipe Bender is supplied with replaceable 15mm and 22mm aluminium bending guides.

Additionally there is a power tool drive to make this indispensable tool even more useful!

Just remember to have your drill set to drive not reverse.

15mm & 22mm Compression **Fitting Olive Puller**

Quantity – 1

Dimensions – $150(h) \times 60(w) \times 40(d)$ mm

The INST2036 works by engaging the tool in the end of the copper pipe and then winding the appropriate bush - 15mm and 22mm included - counter clockwise until it stops at the olive to be removed. The threaded bush is then screwed into the compression nut which is held captive on the pipe on the other side of the olive. Then by rotating the handle clockwise the compression fitting nut is drawn up the pipe and pulls the olive off the pipe without damaging it.

22mm Compression Fitting Olive Cutter

Quantity - 1 Dimensions – $192(h) \times 55(w) \times 25(d)$ mm

INST2031

15mm Compression Fitting Olive Cutter

Quantity - 1

INST2036

Dimensions – 195(h) x 55(w) x 20(d) mm

The INST2030 15mm and INST2031 22mm are designed to remove an olive from copper pipe without damage to the pipe and without producing swarf. The latest version includes replaceable, interchangeable and reversible tungsten carbide blades.

Not for use on steel olives.

Boilers, Flues + System Testing

30mb Gas Test Gauge

Quantity - 1

Dimensions – $550(h) \times 75(w) \times 30(d)$ mm

The INST0257 30mb Gas Test Gauge is Made in Britain and is made from tough plastic. It is used both for testing pipework installations with air for leaks before the introduction of gas and for checking and setting correct gas pressures on domestic and commercial appliances. Extruded cover slides off and may be clipped over the base for standing the tool vertically during use. Hanging tab permits vertical hanging from suitable protrusions. Marked in millibars, the scale adjusts for zeroing the water level.

Mains Water Pressure Test Gauge 11 Bar x 3/4" BSP

Quantity -1Dimensions $-285(h) \times 55(w) \times 40(d)$ mm

INST1510

INST0257

Dry Test Kit 15mm x 4 Bar

Quantity -

Dimensions – $130(h) \times 55(w) \times 30(d)$ mm

The INST1512 Pipe Dry Testing Kit is ideal for dry testing pipe work during and after installation. It has an easy to read triple scale bar, psi and kPa and is suitable for water, air, gas and petroleum oil pipes up to 4 bar, and for testing combi systems. Can be left on test, while flooring is laid to reveal any nail damage also test hot and cold supplies separately to ensure pipes are not crossed. Fitted with a Schrader Valve and 15 mm push fit fitting for quick and easy assembly and has a rubber boot for added protection.

Monument Masters SweatBOX®

The SweatBOX® is the ultimate plumbers soldering tray. The SweatBOX® features a flame retardant engineering grade plastic with a patented clamp for holding different sizing of copper pipe up to 22mm or $\frac{3}{4}$ ".

There is a silicone strip edge to the Sweatbox ensuring heat is not conducted from the hot copper pipe to the plastic of the Sweatbox or the clients property. Adhesive rubber feet are included, helping to prevent scratches to surfaces. The sealed compartments are ideal for holding a gas bottle, separated blowtorch and all the essentials needed for soldering or sweating a joint. There's even a compartment for flux brushes.

Finish – Yellow

Dimensions – $435(h) \times 330(w) \times 240(d)$ mm

Take a closer look at the SweatBOX® features video

MAST20201L

Monument Masters XV 15mm Pipe Bender Monument Masters XXII Extended 22mm Bender

The Monument Masters XV Copper Pipe Bender is a single sized pipe bender for 15mm copper pipe (0.7mm wall).

Quantity – 1

Dimensions – 470(h) \times 190(w) \times 65(d) mm

Less fiddly – with the integrated hook and nylon guide, the integrated hook stop won't flop from side to side and the guide(s) won't fall out

Lighter in the hand than a combi – the XV weighs 1.5kg. The Monument combi weighs more than 4kg

Less cumbersome – you are only using a bender for the size of pipe being bent

Better sight lines – as the bend is in the same plane as the arms of the bender it is easier to line up by eye

Smaller than a combi – the XV has an arm length of 40cm approx. (a combi arm length is 65cm). The XV
